WORK EXPERIENCE

Full Stack Developer   2024- Present
A Full Stack Developer handles both frontend and backend development, working with databases, servers, APIs, and UI/UX. They use technologies like JavaScript, Python, Node.js, React, and SQL for seamless application development.

Frontend Developer   2022- 2023
A Frontend Developer creates engaging, responsive user interfaces using HTML, CSS, and JavaScript frameworks like React, Vue, or Angular. They optimize performance, ensure cross-browser compatibility, and collaborate with designers and backend developers to deliver seamless, visually appealing web applications with excellent user experience.

Backend Developer   2024- Present
A Backend Developer builds and maintains the server side of web applications using languages like Python, Java, or Node.js. They manage databases, ensure security, optimize performance, and develop APIs, collaborating with front-end developers to create seamless, scalable, and efficient applications.
